

Sections 4.5 & 4.6 – I.C.E – More Graphing Practice

Here is a nice summary of all the graphs:

The graphs of the six trigonometric functions

For the following equations, graph at least one period and at least a length of 2π

1. $y = 3\tan\left(\frac{1}{2}x\right)$

Sections 4.5 & 4.6 – I.C.E – More Graphing Practice

2. $y = -\cot(x + \pi) - 1$

3. $y = -2\tan\left(x + \frac{\pi}{2}\right)$

Sections 4.5 & 4.6 – I.C.E – More Graphing Practice

4. $y = \cot(2x) + 3$

5. $y = -3\sin(3x)$

Sections 4.5 & 4.6 – I.C.E – More Graphing Practice

6. $y = \cos\left(x + \frac{\pi}{3}\right) - 3$

7. $y = -\csc x + 2$

Sections 4.5 & 4.6 – I.C.E – More Graphing Practice

8. $y = 2\sec\left(x + \frac{\pi}{6}\right)$

9. $y = 2\sec 2x$

Sections 4.5 & 4.6 – I.C.E – More Graphing Practice

10. $y = -\csc\left(\frac{1}{2}x\right) + 1$

11. $y = \csc 4(x - \pi)$

Sections 4.5 & 4.6 – I.C.E – More Graphing Practice

12. $y = \sec x - 3$

13. Identify the equations of the following graphs. There may be more than one right answer. Practice writing your answer multiple ways!

a)

b)

Sections 4.5 & 4.6 – I.C.E – More Graphing Practice

c)

d)
